Profile

Software & Front-End Developer with a strong background in Scientific studies (95.4% GPA). Developed 15+ deployed GitHub projects encompassing responsive web architectures, automated secure bots, and network security scripts. Experienced in technical system optimization, workstation maintenance, and cross-functional team coordination to deliver production-ready software.

Technical Skills

- HTML5 & CSS3
- Bootstrap
- Responsive Design
- AI Tools & Prompt Engineering
- Task Automation & Scripting
- REST APIs
- JavaScript
- Git & GitHub
- Performance Optimization
- Python Programming
- Node.js
- UI/UX Refactoring

Experience

Freelance Front-End Developer 02/2025 – Present | Gaza, Palestine
Self-Employed (Freelance)

- Designed and deployed a highly responsive, multi-page web platform for a local cafe business, improving page-load speed by 30% using HTML5, CSS3, and Bootstrap.
- Built the official high-resolution landing page for a freelance digital agency, optimizing media assets to reduce bounce rates by 15%.

IT Support & Systems Technician 08/2024 – 02/2025 | Gaza, Palestine
Ministry of Health (Volunteer) 🏢

- Headed technical diagnostics and executed critical maintenance on 600+ devices and advanced technical diagnostics for 10+ workstations.
- Optimized local network configurations and streamlined system performance for over 600+ user environments to improve connectivity by 25% under challenging constraints.

Community Outreach Coordinator 07/2024 – 08/2024 | Gaza, Palestine
UNICEF (Volunteer Campaign)

- Spearheaded community outreach initiatives, engaging directly with 400+ residents during a 2-week public health campaign.
- Managed the strategic deployment and installation of 8 large-scale promotional banners under high-pressure environments.

Projects

Digital Agency Landing Page , Responsive Web Development

- Built the official high-resolution landing page showcasing freelance digital agency competencies.
- Applied semantic HTML5 structure, modern styling animations, and enhanced media assets to improve page load speed by 35%.

Local Cafe Platform , Front-End Development/ KickLance

- Deployed a responsive multi-page platform for a local cafe business using HTML5, CSS3, and Bootstrap.
- Utilized HTML5, CSS3, **JavaScript**, and Bootstrap to build custom mobile-first layouts and interactive components.

Router Auditor Script , Python Scripting & Network Defense

- Spearheaded the development of a programmatic administrative auditing script in Python tailored for home network router security.
- Programmed network scanning and local configuration parser modules to detect vulnerabilities.

Eye Hospital Support & Automation Bot , Node.js & Docker Integration

- Architected a Dockerized WhatsApp bot using Node.js to automate hospital schedule and SOP retrieval.
- Engineered systematized SOP retrieval pipelines and streamlined network resilience to ensure 24/7 system availability for medical staff.

Islamic Center: Prayer Scheduler Portal , Static Web Development & DOM Manipulation

- Engineered a responsive static web portal using HTML5, CSS3, and JavaScript, achieving 100% clean and error-free console outputs.
- Programmed a dynamic countdown utility utilizing custom data-time attributes to parse and calculate schedules for 5+ daily prayer times.

CRUDS: Product Management System , Vanilla JavaScript & Client-Side Storage

- Developed a local-first management platform in Vanilla JS to execute high-performance CRUD operations and automatic real-time price calculations.
- Integrated HTML5 Local Storage to guarantee 100% client-side data persistence and built an optimized search engine to filter product catalogs.

Certifications & Training

Front-End Development Diploma , KickLance

08/2025 – 11/2025 | Gaza, Palestine

- Completed a certified **90-hour** training program spanning **30** practical sessions.

Freelancing & Career Readiness, KickLance

11/2025 – 12/2025 | Gaza, Palestine

- Trained in digital platform management (Upwork, Freelancer).
- Professional portfolio design and resume building.

Python, Engineers Syndicate Gaza

04/2023 – 06/2023 | Gaza, Palestine

- Learned core Python syntax, programming logic, and setup.
- Built basic hands-on projects, including calculators and utility tools.

HTML & CSS, Qattan Cultural Center

06/2022 – 07/2022 | Gaza, Palestine

- Learned basic HTML & CSS to structure simple web pages.
- Introduced to foundational web design concepts and coding.

Education

High School / Scientific Stream

Expected Graduation: 2026 | Gaza, Palestine

AL-Mister private school ☑

- Academic Excellence: Achieved an overall cumulative average of **95.4% in Grade 11**.
- Emphasized advanced scientific coursework and foundational computer science principles.
- Balancing academics with self-taught programming, AI tools, and **volunteering**.

Soft Skills

Analytical Problem-Solving

Applying analytical debugging methodologies to resolve complex software bottlenecks.

Time Management

Balancing high school studies with self-taught programming and freelance work.

Leadership & Teamwork

Collaborating effectively during volunteer initiatives with UNICEF and the Ministry of Health.

Effective Communication

Explaining technical concepts clearly and coordinating with teams and clients.

Languages

Arabic — Native/Bilingual

English — Proficient
